VUNYX®

High Clearance Film (OCD Series)

Vunyx® High Clearance Film is a premium sun control film, crafted from high-quality dyed polyester (PET). This film offers 5% visible light transmission, a 99.90% UV reduction, and 20% infrared (IR) rejection. The color is infused directly into the film during the manufacturing process, ensuring a consistent, stable shade throughout. Designed with a 2-ply structure and coated with an anti-scratch layer for added durability, it delivers a darker tint that enhances privacy and reduces interior glare. Ideal for car care professionals, this film provides superior sun protection while maintaining an aesthetically pleasing appearance.
